DETAILED ACTION

Receipt is acknowledged of a reply to the previous Office Action, filed October 5, 2006. Claims 33-35 and 67 were canceled; claim 1 was amended.

Claims 1-13, 32, 36-57, 60-66, 68 and 69 are pending and under consideration in the instant application. Any rejection of record in the previous Office Action, mailed March 30, 2006, that is not addressed in this action has been withdrawn.

Because this Office Action only maintains rejections set forth in the previous Office Action and/or sets forth new rejections that are necessitated by amendment, this Office Action is made FINAL.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 62-63, 66 and 69 stand rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is a new matter rejection.

Response to Arguments Concerning Claim Rejections – 35 USC § 112 (1)

Applicant's arguments filed October 5, 2006 have been fully considered but they are not persuasive.

The following grounds of traversal are presented:

Applicant has support for CFTR polypeptides having mutations other than $\Delta F508$; specifically, individual mutations $\Delta I507$, S549R and G551D are disclosed. Furthermore, many mutations in CFTR were known in the art prior to the filing date. The claims encompass any mutation in CFTR other than $\Delta F508$, of which there are millions of possibilities. It would be inefficient to recite all of them.

Applicant's arguments have not been found persuasive for the following reasons:

While Applicants are not required to list the millions of possible mutations, Applicant is required to list a representative number. In the Specification and Figure 2A, B and C, Applicant discloses three mutations other than $\Delta F508$. This species of mutations is not sufficient to encompass the broad genus of possible mutations as claimed. As Applicant stated, there are millions of possibilities, each with a potentially different affect on CFTR activity. Therefore, any mutation in CFTR that is not $\Delta F508$ is not supported by the three examples, $\Delta I507$, S549R and G551D.

Allowable Subject Matter

Claims 1-13, 32, 36-57, 60-61, 64-65 and 68 are allowed.

Art Unit: 1636

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
